**Scope**

- **Level:** Intermediate
- **Duration:** 4 hours
- **Format:** Digital learning
- **Platform support:** Palo Alto Networks Prisma Cloud security platform

**Objectives**

Successful completion of this online training will enhance the participant’s understanding of how to perform the four phases of onboarding your public cloud accounts into Prisma Cloud to provide comprehensive visibility into your cloud resources and services, user activity, and network traffic.

After your cloud accounts have been onboarded, Prisma Cloud can be fully operationalized. This course explores the use of the REST APIs that are integral to the Prisma Cloud platform.

Completion of this class also will help participants develop an in-depth knowledge of how to troubleshoot and gain visibility into the most common system issues.

**Target Audience**

DevOps, SecOps, Security Compliance, Security Operations Center, Customer Success Manager, Customer Success Engineer, System Engineer

**Prerequisites**

Participants must have completed Prisma Cloud: Securing the Cloud (EDU-150). Also recommended is one year of experience with public cloud deployments, basic knowledge of cloud computing and cloud computing concepts, proficiency with AWS, Google Cloud Platform, Azure, and Alibaba cloud platforms, and basic knowledge of cybersecurity concepts.

**Palo Alto Networks Education**

The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks and safely enable applications.
