The Demisto Analyst training course is a compilation of narrated videos and demonstrations that will help you:

- Relate Demisto case management, automation, and collaboration features to the requirements, workflows, and challenges of your security operations team
- Identify key features that facilitate incident monitoring, management, and assignment
- Explain how Demisto enables efficiency and collaboration in the typical day of an analyst's incident investigation and response
- Describe how to use Demisto to monitor indicators and create new incidents from indicators of particular interest

Training Outline

1 - Introduction to Demisto Enterprise
2 - Incident Monitoring and Management
3 - Incident Investigation and Response
4 - Monitoring Indicators in Demisto
5 - Dashboards and Reports

Scope

- **Level:** Intermediate
- **Duration:** 2 hours
- **Format:** Self-paced digital learning

Objectives

This training is designed to introduce you to the Demisto platform, user roles, and the value that Demisto brings to security operations. Demisto is a comprehensive security orchestration, automation, and incident-response platform. It combines incident case management, automated enrichment, automated and analyst-involved task execution, as well as analyst collaboration.

Target Audience

Palo Alto Networks Employees, Partners, and Customers

Prerequisites

There are no prerequisites, but familiarity with security operations and incident response teams would be helpful.

Palo Alto Networks Education

Training from Palo Alto Networks and Palo Alto Networks Authorized Training Partners delivers knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks Security Operating Platform and your ability to help prevent successful cyberattacks and safely enable applications.
