TRAPS 6.1: CLOUD SERVICE OPERATIONS (EDU-190)

The Palo Alto Networks Traps 6.1: Cloud Service Operations (EDU-190) course is a 6-hour, 30-minute self-paced digital training that will help you:

- Become familiar with exploits, malware-driven attacks, and Traps protection techniques
- Learn how to activate, configure, and manage the Traps management service on the hub
- Learn how to install a Traps agent onto endpoints
- Gain experience with handling security events and troubleshooting

### Course Modules

1. Traps Overview
2. Working with Cortex Apps
3. Traps Management Service
4. Traps Malware Protection
5. Traps Exploit Protection
6. Managing Security Events
7. Traps Troubleshooting
8. Agent-Server Communication
9. Cortex Infrastructure Services
10. Advanced Operations

### Objectives

This self-paced digital training explains how Traps protects against exploits and malware-driven attacks. The course details exploration and configuration of the cloud-based Traps management service, installation of Traps agents onto Windows and Linux endpoints, building policy rules and profiles, management of security events and logs creations exceptions, and Traps management service-provided central response actions, including the new Live Terminal capability.

### Target Audience

Endpoint security engineers, system administrators, and technical support engineers

### Prerequisites

Participants must have familiarity with enterprise security concepts.

### Palo Alto Networks Education

The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks Security Operating Platform and your ability to help prevent successful cyberattacks and safely enable applications.
