Overview

The Palo Alto Networks Panorama 8.1: Managing Firewalls at Scale (EDU-220) course is two days of instructor-led training that will help you:

- Learn how to configure and manage the next-generation Panorama™ management server
- Gain experience configuring templates (including template variables) and device groups
- Gain experience with administration, log collection, and logging and reporting
- Gain experience with Panorama™ High Availability and Panorama™ troubleshooting
- Become familiar with new Panorama™ features such as Panorama™ in the public cloud, the Logging Service, and GlobalProtect cloud service

Course Objectives

This course will help students to gain in-depth knowledge about how to configure and manage their Palo Alto Networks® Panorama™ management server. Upon completion of this course, administrators should be familiar with the Panorama™ management server’s role in managing and securing their overall network. Network professionals will be shown how to use Panorama™ aggregated reporting to provide them with a holistic view of a network of Palo Alto Networks® next-generation firewalls.

Scope

- Course level: Intermediate
- Course duration: 2 days
- Course format: Combines lecture with hands-on labs

Target Audience

Prerequisites

Students must complete the Firewall 8.1 Essentials: Configuration and Management (EDU-210) class, and be familiar with Palo Alto Networks® next-generation firewall management and basic networking concepts, including routing and IP addressing.

Palo Alto Networks Education

Training from Palo Alto Networks® and Palo Alto Networks® Authorized Training Centers delivers knowledge and expertise that prepare you to protect our digital way of life. Our trusted security certifications validate your knowledge of the Palo Alto Networks® next-generation security platform and your ability to help prevent successful cyberattacks and safely enable applications.
