Prisma Access SaaS Security: Business Use Case

Prisma Access is the best solution for any enterprise in immediate need of providing remote users secure access to corporate resources. The Prisma Access rapid deployment model (regardless of size, number, or geographic location) allows IT to scale its secure remote access capabilities dynamically in response to changing business requirements.

The Prisma Access SaaS Security: Business Use Case course is intended for people in the fields of public cloud security and cybersecurity, or for anyone who wants to learn the business use case of securing remote networks and mobile users.

**Course Topics**
1. Business Use Case and Resolution
2. Activation for Remote Users
3. Required Access to Remote Networks
4. Required Access for Mobile Users

**Scope**
- **Level:** Intermediate
- **Duration:** 10 minutes
- **Format:** Self-paced digital learning

**Objectives**
This training describes how Prisma Access provides remote access for your employees to your corporate resources while also providing a higher level of verified security. Successful completion of this course will help enhance your understanding of how Prisma Access already has the infrastructure in place to provide secure computing for mobile users that now are required to work from home.

**Target Audience**
IT Managers, InfoSec Managers, Services Providers, Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, and Network Engineers

**Prerequisites**
Participants should have a basic familiarity with security concepts, including sophisticated threat approaches. Participants should be familiar with how to license and activate cloud services. Participants should be familiar with Palo Alto Networks Panorama and the next-generation firewall. This digital training is available in the online Learning Center.

**Palo Alto Networks Education**
The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks and safely enable applications.
