What’s New in PAN-OS Version 9.1

The Palo Alto Networks What’s New in PAN-OS® 9.1 course is about 1.5 hours of self-paced training designed for individuals that already are familiar with PAN-OS version 9.0 firewall administration. Those individuals should take this course to update their PAN-OS 9.0 knowledge and skills. The course includes narrated illustrations and demonstrations, and knowledge check questions.

Course Sections include:

• Changes to the initial web interface login process
• Using the new Commit Status window
• Configuring and using App-ID application labels
• Configuring App-ID application dependency requirements
• Configuring and using new User-ID dynamic user groups
• Panorama new features
• Purpose and benefits of the new SD-WAN network feature
• Changes to GlobalProtect logging and monitoring

Objectives
Successful completion of this online, self-paced course should enhance the student’s understanding of how to configure and operate new PAN-OS 9.1 features.

Target Audience

Prerequisites
Students should complete the Firewall 9.0 Essentials: Configuration and Management course, or have equivalent experience.
