

About the connector

Palo Alto Networks® AutoFocus simplifies workflows to create and enforce new controls, from fully automated to user-directed, within the same unified security platform.

This document provides information about the PaloAlto AutoFocus connector, which facilitates automated interactions with Palo Alto Networks® AutoFocus using CyOPs™ playbooks. Add the PaloAlto AutoFocus connector as a step in CyOPs™ playbooks and perform automated investigative operations, such as hunting IP addresses, domains, or URLs on Palo Alto Networks® AutoFocus.

Version information

Connector Version: 1.0.0

Authored By: CyberSponse, Inc.

Certified: No

Installing the connector

All connectors provided by CyOPs™ are delivered using a CyOPs™ repository. Therefore, you must set up your CyOPs™ repository and use the yum command to install connectors:

```
yum install cyops-connector-paloalto-autofocus
```

For the detailed procedure to install a connector, click [here](#).

Configuring the connector

For the procedure to configure a connector, click [here](#).

Actions supported by the connector

The following automated operations can be included in playbooks and you can also use the annotations to access operations from CyOPs™ release 4.10.0 onwards:

Function	Description	Annotation and Category
Hunt IP	Hunts an IP address that you have specified on PaloAlto AutoFocus.	hunt_ip Investigation

Function	Description	Annotation and Category
Hunt URL	Hunts a URL address that you have specified on PaloAlto AutoFocus and retrieves a list tags associated with the specified URL from PaloAlto AutoFocus .	hunt_url Investigation
Hunt Domain	Hunts a domain that you have specified on PaloAlto AutoFocus and retrieves a list tags associated with the specified domain from PaloAlto AutoFocus .	hunt_domain Investigation
Hunt File	Hunts a filehash that you have specified on PaloAlto AutoFocus and retrieves a list tags associated with the specified filehash from PaloAlto AutoFocus .	hunt_file Investigation
Get Report	Retrieves a report from PaloAlto AutoFocus, based on tag name that you have specified.	get_report Investigation

Included playbooks

The *Sample - PaloAlto AutoFocus - 1.0.0* playbook collection comes bundled with the PaloAlto AutoFocus connector. This playbook contains steps using which you can perform all supported actions. You can see the bundled playbooks in the **Automation > Playbooks** section in CyOPs™ after importing the PaloAlto AutoFocus connector.

Note: If you are planning to use any of the sample playbooks in your environment, ensure that you clone those playbooks and move them to a different collection, since the sample playbook collection gets deleted during connector upgrade and delete.
